2.4: Professional Medical Writers

2.4.1: Role of the Professional Medical Writer. Professional medical writers may assist authors in preparing publications and presentations. Properly trained and experienced writers can help authors with the development of publications in a compliant, complete, and timely manner, particularly when authors have limited time or knowledge of publication ethics and current publication and reporting guidelines (7, 21-23). In addition to technical expertise, medical writers should have a good understanding of publication ethics and current publication guidelines. Training programs are provided by various organizations (for example, ISMPP, American Medical Writers Association, European Medical Writers Association, and Drug Information Association), and certification programs with enforceable codes of conduct have been introduced (ISMPP certification Web site, www.ismpp.org/certification; American Medical Writers Association certification Web site, www.amwa.org/certification).

Discrete store-operated calcium influx into an intracellular compartment in rabbit arteriolar smooth muscle

R. Flemming, A. Cheong, A. M. Dedman and D. J. Beech

School of Biomedical Sciences, University of Leeds, Leeds LS2 9JT, UK

This study tested the hypothesis that store-operated channels (SOCs) exist as a discrete population of Ca^{2+} channels activated by depletion of intracellular Ca^{2+} stores in cerebral arteriolar smooth muscle cells and explored their direct contractile function. Using the Ca^{2+} indicator fura-PE3 it was

Leaving academia

- Narrow career path
- Short-term contracts
- Time for a change

Why did I become a medical writer?

Wanted to stay
in science

Clear career
pathway

Good
mentorship and
training

Good financial
benefits

Variety of
projects and
therapy areas

Work in different
parts of the UK /
world

**... and fundamentally, I enjoy and am
good at writing...**

‘Ups’ and ‘downs’ of MedComms

Challenges: deadlines

Challenges: criticism

Challenges: writing treadmill

Upsides: variety

- Epilepsy
 - Oncology
 - Spinal devices
 - Thrombosis
 - Men's health
 - Plus lots more...
- 

Upsides: teamwork

Upsides: travel

- New York
- Chicago
- San Francisco
- Stockholm
- Prague
- Paris
- Florence
- Munich

Upsides: working with the experts

Upsides: demand for your services

2011

- Co-founder & Director, Medical Writing Agency (Aspire Scientific)

Aspire Scientific is a boutique **medical writing agency** led by experienced professionals and supported by a select team of talented and highly educated writers

We deliver an extensive range of high-quality medical writing projects

Looking for paid work experience in medical communications/medical writing?

Aspire Scientific offer paid work experience to talented and suitably qualified UK-based individuals who have or are working towards a PhD.

If you would like to find out more, then please email Jane Woodrow (jane.woodrow@aspire-scientific.com), with a copy of your CV and, to showcase your writing skills, a 250-word summary of your current research focus.

Quote from a former member of our team, now working for a medical communications agency:

"Working with Aspire alongside my academic role has been a fantastic experience. I have been involved in a range of oncology-based medical writing projects, which has given me a unique insight into the industry. I thoroughly enjoyed completing each assignment and really benefitted from the constructive feedback I received from Aspire. I am now leaving academia having been offered a position with a MedComms agency. My time with Aspire not only helped to confirm my career choice of medical writer, but I believe really helped with my interviews, allowing me to demonstrate a genuine interest in MedComms and my familiarity with the industry."

What can you learn from my experiences in MedComms?

- Your PhD and/or post-doc are valued!
- But you have to be prepared to start again ‘at the bottom’ and prove your worth in a new, unfamiliar environment
 - Once you have done that, however, there are a lot of opportunities
- Before applying for jobs, try to ensure you can demonstrate the following skills
 - Writing experience and talent
 - Research skills
 - Scientific accuracy
 - Ability to work in a team
 - Knowledge of industry codes and guidelines
